Notes: LOA Total includes anchor platform, pulpit and swim step. Air Draft is measured from waterline to top of radar arch (does not include mast). Displacement Light is at Minimum Operating Condition
Disclaimer: The question most manufacturers ask themselves when considering a new feature is whether it is necessary to include it in order to sell the boat. In the case of the Fleming, we ask only whether its inclusion will make the boat safer, better or more convenient. That is why we have introduced literally hundreds of refinements since we started construction in 1985 and why we continue the process today. For that reason Fleming Yachts reserves the right to make changes to specifications and equipment without notice. Photos may include optional extras and custom items that are not on the standard specification. We advise you to contact your local Fleming dealer for more information.
